

Appendix A Financially Constrained and Unconstrained Transportation Project List

2040 San Benito Regional Transportation Plan

Appendix A: Financially Constrained and Unconstrained Transportation Project List

Financially Constrained Projects: list of projects that could be funded based on revenues reasonably expected over the next 22-years.
 Financially Unconstrained Projects: list of candidate projects that would be funded, only if additional monies become available or projects that are partially Constrained. These projects are solely listed for illustrative purposes.
 * Partially Constrained and Unconstrained

The following added language has been incorporated: The Federal Transportation Act and state guidelines require that the RTP reflect the cost of implementing projects in "year of expenditure dollars" (YOE) and must be financially constrained to match escalated projected revenues. While it is unknown the exact year that most projects will be implemented, this spreadsheet demonstrates how much it would cost to implement the constrained RTP project list if the annual escalation rate were 1.075%. Since the actual year that a project will be constructed may vary and numerous economic and external factors can impact actual cost, actual costs will likely vary. This list includes "Constrained" projects which could be funded within the projected revenues identified in this document. "Unconstrained" project are also identified for illustrative purposes.
