INFORMATION ITEMS:

7. Receive Update on the Status and Development of the 2050 Regional Transportation Plan – Borick

Samuel Borick provided an update on the development of the 2050 Regional Transportation Plan (RTP). Recent efforts are focused on finalizing the draft 2050 RTP Budget and reviewing draft performance measures. Staff will present the draft 2050 RTP Budget to the SBCOG Board in November and the draft 2050 RTP to the Board for adoption in December. Final adoption of the 2050 RTP is scheduled for adoption by the SBCOG Board in June 2026.

Binu Abraham emphasized the importance of TAC members reviewing and providing feedback on the Draft RTP chapters once they are circulated, to ensure alignment with local initiatives and policies.

There was no public comment.

8. Receive Information Regarding the Purpose and Intent of Transit First Policies – Borick

Binu Abraham reported that the objective of a Transit First policy is to establish a clear, actionable framework at the jurisdictional level that prioritizes public transit in planning, design, and operations. These policies aim to improve transit equity, reliability, and competitiveness by incorporating transit-supportive infrastructure, land-use strategies, and multimodal connectivity. She emphasized the importance of including transit considerations in planning projects and Complete Streets initiatives.

There was no public comment.

There being no further business to discuss, Jill Leal-Andrade motioned to adjourn the Technical Advisory Committee meeting at 2:20 p.m. Motion seconded by Ashley Collick.

STAFF REPORT

Action

Prepared By: Samuel Borick
Transportation Planner

Subject: 2050 Regional Transportation Plan

Agenda Item 7

Approved By: Binu Abraham, Executive
Director

Meeting Date: December 4, 2025

Recommendation:

- a. RECOMMEND the Draft 2050 Regional Transportation Plan for presentation to the Council of San Benito County Governments Board of Directors.
- b. RECEIVE update on the status and development of the 2050 Metropolitan Transportation Plan / Sustainable Communities Strategy

Summary:

SBCOG staff has been working closely with local agencies, Caltrans, and AMBAG since spring 2023 to develop the 2050 Regional Transportation Plan (RTP). Throughout this process, the budget, investment strategies, project list, and key decision points have been collaboratively vetted and refined with our partner agencies. We have now reached a significant milestone with the completion of the draft 2050 RTP. The next steps include a full review of the draft by the TAC members, followed by SBCOG Board action to release the draft 2050 RTP and initiate the public comment period, followed by a public hearing, after which SBCOG will address the comments received.

In addition, Association of Monterey Bay Area Governments (AMBAG) staff will provide an update on the status and development of the 2050 Metropolitan Transportation Plan / Sustainable Communities Strategy (2050 MTP/SCS).

**MEMORANDUM**

TO: SBtCOG Technical Advisory Committee

FROM: Heather Adamson, Director of Planning

SUBJECT: Draft 2050 Metropolitan Transportation Plan/Sustainable Communities Strategy and Draft Environmental Impact Report

MEETING DATE: December 4, 2025

RECOMMENDATION:

AMBAG staff will provide an overview on the Draft 2050 Metropolitan Transportation Plan/Sustainable Communities Strategy (MTP/SCS) and Draft Environmental Impact Report (EIR). Both documents were released for public review and comment on November 17, 2025.

BACKGROUND/ DISCUSSION:

The 2050 MTP/SCS is the blueprint for a regional transportation system that further enhances our quality of life, promotes sustainability, and offers more mobility options for people and goods. The MTP/SCS is built on an integrated set of public policies, strategies, and investments to maintain, manage, and improve the transportation system so it meets the diverse needs of our changing region through 2050.

The 2050 MTP/SCS contains a robust transportation network, with a diversity of projects that will provide residents and visitors with a variety of travel choices. The transportation network, in conjunction with how local jurisdictions develop land, will provide additional opportunities for walking, biking, getting to work, going to school, shopping and playing.

Passed in 2008, Senate Bill 375 (SB 375) encourages planning practices that create sustainable communities. SB 375 also charged the California Air Resources Board (CARB) with setting regional targets for reducing greenhouse gas emissions by 2035. AMBAG must prepare a Sustainable Communities Strategy (SCS) as part of the MTP. The SCS must demonstrate how the region will meet its target for reducing greenhouse gas emissions from automobiles and light trucks. The 2050 MTP/SCS demonstrates that our region meets the regional GHG target.

The following sections present a brief overview of the Draft 2050 MTP/SCS. The 2050 MTP/SCS adoption process section describes the process to obtain public input on the 2050 MTP/SCS and major milestones leading to the Board considering adoption of the 2050 MTP/SCS in June 2026.

Vision

AMBAG adopted a framework of goals and policy objectives to guide the development of the MTP/SCS. The five goal areas are:

- *Mobility – Build and maintain a safe and robust multimodal transportation network.*
- *Environment – Create a sustainable and healthy region for all.*
- *Communities – Develop, engage, connect, and sustain communities that are livable and thriving.*
- *Economic – Support a sustainable, efficient, and productive regional economic environment that provides opportunities for all.*
- *Equitable – Plan for people of all ages, abilities, and backgrounds.*

Transportation Investments

The Draft 2050 MTP/SCS contains a number of improvements to our multimodal transportation system. The MTP sets forth an integrated approach to transportation investments that maximizes the benefits of the existing transportation system by investing in system preservation and maintenance, along with strategic system expansion and management strategies. The transportation investments will provide more travel choices for our region's residents and visitors.

Sustainable Communities Strategy

The SCS demonstrates the region's ability to meet the GHG emission reduction target set forth by the California Air Resources Board (CARB). The SCS outlines the region's plan for integrating the transportation network within an overall land use pattern that responds to projected growth, housing needs, changing demographics, and transportation demands while reducing GHG emissions. The overall SCS land use development pattern complements the proposed transportation network which emphasizes multimodal system enhancements, system preservation, and improved access to high quality transit.

Financial Plan

The Financial Plan includes a revenue forecast of local, state and federal sources that are reasonably expected to be available through 2050. Total revenues estimated for the Draft 2050 MTP/SCS are approximately \$16 billion.

Performance Measures

In support of the goals and policies established through public participation efforts and stakeholder involvement, more than a dozen performance measures were established to measure how well the MTP/SCS performs. The performance measures quantify the transportation, environmental, economic and equity benefits of the MTP/SCS. The performance measures for the Draft 2050 MTP/SCS is included as Attachment 2. Detailed information regarding the performance measures can be found in Chapter 5 and Appendix G of the Draft 2050 MTP/SCS.

Public Participation

AMBAG engaged a wide range of stakeholder groups, elected officials, community groups, and the general public through a series of meetings and workshops. The input received through this process has shaped the 2050 MTP/SCS in a meaningful way. AMBAG will continue to involve and engage the stakeholders and the public in the process of refining and finalizing the 2050 MTP/SCS.

Environmental Impact Report

AMBAG, in consultation with the RTPAs and the consulting team, is preparing an EIR for the 2050 MTP/SCS. Prepared in accordance with the California Environmental Quality Act (CEQA), the Draft EIR evaluates the impacts of the 2050 MTP/SCS on the physical environment at the program level. The Program EIR also serves as the EIR for each of the RTPA's 2050 Regional Transportation Plans. The Program EIR analyzes a range of impacts resulting from future development consistent with the regional growth projections and from improvements to the regional transportation network. It also analyzes three alternatives to the proposed 2050 MTP/SCS. The EIR provides the framework for subsequent project level environmental analysis of specific projects, in which individual project impacts will be evaluated separately as project features are defined.

2050 MTP/SCS and EIR Adoption Process

To obtain public input on the development of the Draft 2050 MTP/SCS, a broad range of media and communication avenues have been and will be utilized to provide information, solicit participation and input and allow for ongoing feedback and updates. A major goal of this public involvement effort is to reach out to both nontraditional and traditional audiences, to include them in the transportation planning process.

AMBAG will hold public workings and public hearings, in January 2026, to allow for public comment on the 2050 MTP/SCS and the EIR. The public workshops/hearings schedule and format will provide opportunities for information to be shared and public comments to be

submitted. More information about these public meetings can be found in Attachment 2. The public comment period for the 2050 MTP/SCS and DEIR is from November 17, 2025 to January 30, 2026.

Upcoming major milestones include:

- **January 2026** – Public workshops/hearings on Draft 2050 MTP/SCS/EIR
- **January 30, 2026** – Close of the public comment period for the Draft 2050 MTP/SCS/EIR
- **February/March 2026** – Review and response to comments and consider proposed changes to the 2050 MTP/SCS
- **June 2026** – AMBAG Board considers certification of the Final EIR and adoption of the Final 2050 MTP/SCS
